About the Organization

Mission

To improve the health and well-being of individuals, families and our communities through innovation and the pursuit of excellence.

Vision

Exceptional People. Extraordinary Care. Every Time.

Values

The iABCs of MemorialCare

With a focus on solid fundamentals – Integrity, Accountability, Best Practices, Compassion and Synergy – MemorialCare Health System is delivering the highest standard of patient care and exceptional clinical outcomes. What sets us apart is our ability to leverage the strengths of our health system, from operational efficiencies and the application of new technologies, to the exchange of ideas, expertise and best practices. It's what we mean when we say: MemorialCare. Excellence in Health Care.

MemorialCare Health System

MemorialCare Health System is a nonprofit integrated delivery system that includes five hospitals – Long Beach Memorial, Miller Children's & Women's Hospital Long Beach, Community Hospital Long Beach, Orange Coast Memorial, and Saddleback Memorial; medical groups – MemorialCare Medical Group and Greater Newport Physicians; a health plan – Seaside Health Plan; and numerous outpatient health centers, imaging centers and surgery centers throughout the Southland (Orange County and Los Angeles County). For more information on our work and accomplishments please visit <http://www.memorialcare.org/about/reports>.

Miller Children's & Women's Hospital Long Beach

Miller Children's & Women's Hospital Long Beach (MCWHLB) is a not-for-profit, pediatric teaching hospital that provides specialized pediatric care for children and young adults, as well as maternity care for expectant mothers. The Hospital is located on a 54-acre campus that it shares with Long Beach Memorial Medical Center. These hospitals function under the same tax identification number but are separately licensed hospitals.

The hospital treats more than 8,000 children each year and has become a regional pediatric destination for more than 84,000 children, who need specialized care in the outpatient specialty and satellite centers. Only five percent of all hospitals are children's hospitals, making them unique not only to children's health care needs in the community, but across the region. Miller Children's is one of only eight free-standing children's hospitals in California. The MemorialCare Center for Women at Miller Children's & Women's Hospital delivers more than

6,000 babies each year and more than 1,300 NICU babies get care at Miller Children's & Women's each year.

Miller Children's & Women's Hospital Long Beach features eight Centers of Excellence, including seven major inpatient care centers within the hospital and comprehensive outpatient specialty centers that feature more than 30 sub-specialties, and include 16 California Children Services (CCS) approved special care centers. These Centers provide specialized care for children with chronic conditions, such as pulmonary, gastroenterology, orthopedics, cardiology, rehabilitation, diabetes, asthma, autism, and hematology/oncology conditions.

Governance

The Board of Directors guided the direction of community benefit, with assistance from the Community Benefit Oversight Committee (CBOC).

Community Benefit Oversight Committee

The CBOC (Community Benefit Oversight Committee) is an advisory committee for the MemorialCare Long Beach hospitals' community benefit programs and reports to the Strategy Committee. The CBOC reviews and validates legal and regulatory compliance specific to community benefit mandates; assures community benefit programs and services are effectively meeting identified community health needs, with emphasis on populations with unmet health needs; and increases transparency and awareness of community benefit activities. The members of the CBOC include:

Lynette Bello, Supervisor, Welcome Baby Program

Angie Benton, Accreditation Coordinator, Long Beach Department of Health and Human Services

Melissa Biel, Community Benefit, MemorialCare Health System

Susan B. Feldman, Development Associate, Grants, Mental Health America of Los Angeles

Martha P. Gonzalez, Community Relations Manager, Long Beach Memorial

Linda Kerr, Diabetes Program Director, Long Beach Memorial

Peter J. Mackler, Executive Director, Government Relations and Policy, MemorialCare Health System

Christine Petit, Executive Director, Building Healthy Communities: Long Beach

Danielle Sees, Maternal, Child, Adolescent Health Coordinator, Long Beach Department of Health & Human Services

William Webster, Chairman, Finance Committee, Vice-Chairman, Long Beach Memorial Board of Directors

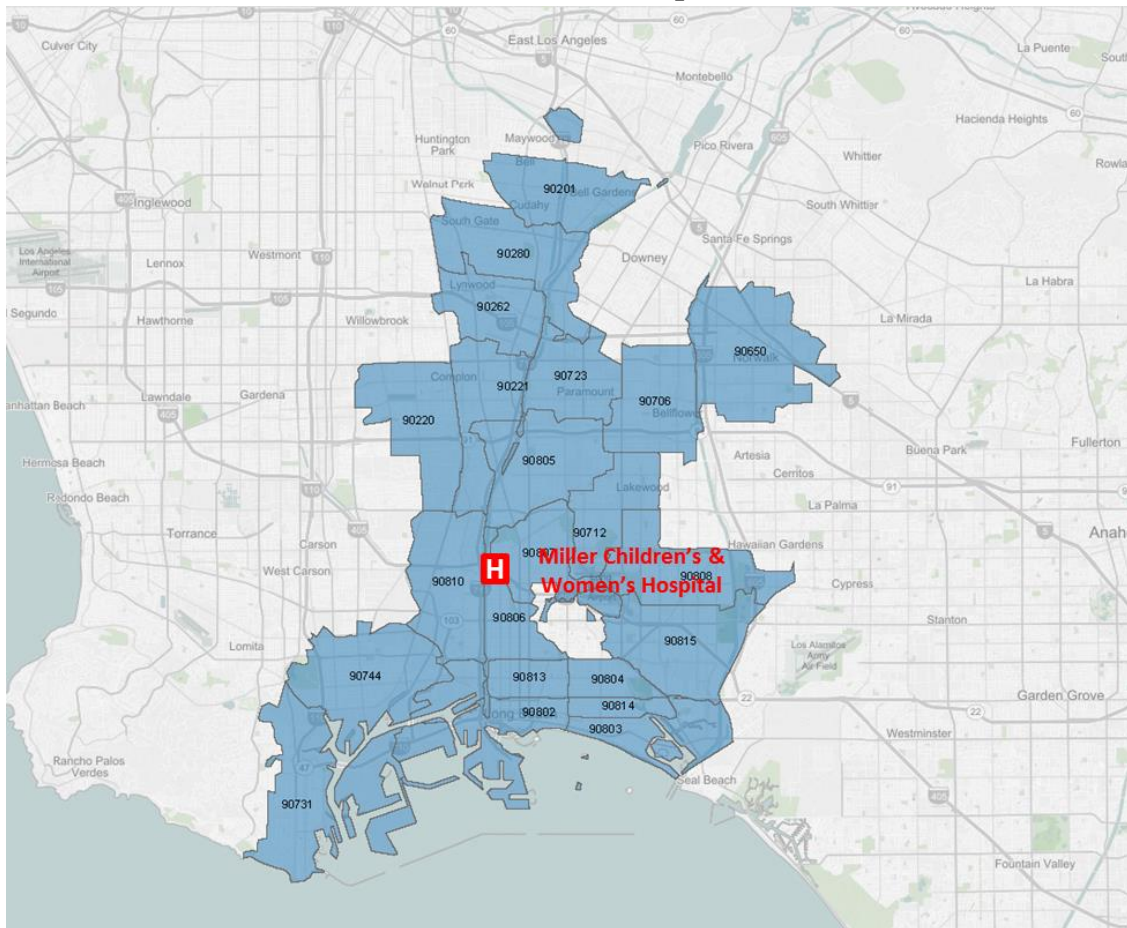

Our Community

Miller Children's & Women's Hospital is located at 2801 Atlantic Ave., Long Beach, California 90806, in Los Angeles County. The Miller Children's & Women's Hospital service area consists of the following cities and zip codes.

Miller Children's & Women's Hospital Service Area by Zip Code and Community

90201	Bell/Cudahy	90802	Long Beach
90220	Compton	90803	Long Beach
90221	Compton	90804	Long Beach
90262	Lynwood	90805	Long Beach
90280	South Gate	90806	Long Beach
90650	Norwalk	90807	Long Beach
90706	Bellflower	90808	Long Beach
90712	Lakewood	90810	Long Beach
90723	Paramount	90813	Long Beach
90731	San Pedro	90814	Long Beach
90744	Wilmington	90815	Long Beach

Service Area Map

The City of Long Beach is a coastal community located in Los Angeles County. Based on the U.S. Census, Long Beach is the thirty-sixth most populous city in the nation and seventh in California. The city is diverse in terms of race and ethnicity. Hispanics/Latinos make up 41.3% of the population in Long Beach; Whites account for 28.6% of the population; Blacks/African Americans comprise 12.9% of the population and Asians 12.5%. Native Americans, Hawaiians, and other races combined total 4.7% of the population. Long Beach has the largest Cambodian community in the United States.

The service area for Miller Children's & Women's Hospital includes 1,221,526 residents. Over one-third (38.5%) of the service area residents live in Long Beach with 61.5% of service area residents living in the communities of Bell/Cudahy, Bellflower, Compton, Lakewood, Lynwood, Norwalk, Paramount, San Pedro, South Gate and Wilmington. Compared to the State, the service area has a higher percentage of children and youth, ages 0-19 (31.3% in the services area, 27.5% in the State) and a slightly lower percentage of seniors, 65 years and older (8.8% in the service area, 11.8% in the State). In terms of race/ethnicity, 62.3% are Hispanic/Latino; 17.1% are White; 10.3% are Blacks/African American and 7.5% are Asian. Native Americans, Hawaiians and other races combined makeup 2.8% of the population. 30.9% of service area residents who are 25 years old and older have less than a high school diploma; a higher rate compared to the State (18.7%). Additionally, a larger percentage of service area residents live below 200% of the federal poverty level (FPL) as compared to the state (47.7% of service area residents, 35.9% in the State).

Community Health Needs Assessment

Miller Children's & Women's Hospital conducted its most recent community health needs assessment in 2016. As in previous years, hospitals and organizations in the greater Long Beach community worked in collaboration to complete the CHNA. The hospitals and organizations that participated in the Long Beach CHNA Collaborative included: Dignity Health St. Mary Medical Center, Kaiser Permanente South Bay, Long Beach MemorialCare System (Long Beach Memorial Medical Center, Community Hospital Long Beach and Miller Children's & Women's Hospital), The Children's Clinic "Serving Children and Their Families" and the City of Long Beach Department of Health and Human Services. The Long Beach collaborative engaged Harder+Company Community Research to conduct the needs assessment. Through high-quality, culturally-based evaluation, planning, and consulting services, Harder+Company helps organizations translate data into meaningful action.

The Long Beach CHNA Collaborative reviewed secondary data from local, county, state and national sources to develop a comprehensive community profile that was organized by health needs. When reviewing possible secondary data sources, the collaborative considered: (1) the geography for which that data was available, prioritizing data that were available at more local

levels (e.g., data that were available at the zip code, city or Service Planning Area level) and (2) when the data were collected, prioritizing the most current data available.

Analyses were conducted at the most local level possible. Also, when available, data about subgroups that are particularly impacted by the social determinant of health, health behavior or outcome were collected to develop a better understanding of the health needs within the community. This report includes benchmarks comparing secondary data for the hospital's service area against other similar communities such as other SPAs, the County and the State. When available, Healthy People 2020 Objectives were included as a benchmark.

Community input was provided by a broad range of community members and leaders through key informant interviews and focus groups. Interviewees included public health experts; representatives from state, local, tribal, or other regional governmental public health departments (or equivalent department or agency); as well as leaders, representatives, or members of medically underserved, low-income and minority populations. A total of 34 key informant interviews were conducted in October and November 2015 for the needs assessment.

Additionally, eight focus groups were conducted throughout the greater Long Beach community. A total of 52 community members participated in the focus groups. Many individuals who participated in focus groups were leaders, representatives or members of medically underserved, low-income and minority populations.

Priority Health Needs

Significant health needs were identified through a scoring process of the primary and secondary data collected. Those health needs that were confirmed by more than one indicator were identified as a significant health need: (1) secondary data showed that the size of the health need was a concern, as measured by the proportion of the community affected, compared to the benchmarks (e.g., SPA, County, State or Healthy People 2020 Objectives) and (2) that primary data collection efforts (i.e., key stakeholder interviews and focus groups) identified the health need as a concern in the service area. Identified significant health needs included:

- Access to Care
- Access to Housing
- Chronic Disease
- Crime and Violence
- Economic Security
- Education
- Environment and Climate
- Mental Health
- Obesity and Diabetes
- Oral Health
- Pregnancy and Birth Outcomes

- Preventive Care
- Substance Abuse and Tobacco

The complete Community Health Needs Assessment report and the prioritized health needs can be accessed at www.memorialcare.org/content/community-benefit.

Community Benefit Services Summary FY2016

Community benefit services promote health and healing and are focused on addressing the identified unmet health needs of the community. For a program or service to be considered a community benefit it must: improve access to health care; or enhance the health of the community; or advance medical or health care knowledge; or reduce the burden of government or other nonprofit community efforts.

In FY2016, Miller Children's & Women's Hospital Long Beach provided community benefit activities and programs within its service area. A summary of these activities follows:

Community Health Improvement Services

Activities carried out to improve community health, available to the public, which address a community need. Programs and activities were provided through the Family Resource Center, Perinatal Health and Lactation Support Services, Jonathan Jaques Children's Cancer Center, Todd Cancer Institute, Pediatric Safety, and Child Life Program.

The Family Resource Center is a place for families raising children with special needs to find knowledge and support as they navigate through their health care journey. While the Long Beach Family Resource Center is located in Miller Children's & Women's Hospital Long Beach and supports patients and their families who are hospitalized, services are also available to all families in the community. Parent support initiatives include the Parent-to-Parent Mentor Program, Supporting Kids With Diabetes (SKWD), and the Type 1 Diabetic Playgroup.

Miller Children's & Women's Hospital Long Beach is an active partner with the Long Beach Alliance for Children with Asthma (LBACA). LBACA provides education and outreach using promotoras community health workers. They provide asthma control education to physicians, nurses and the community. The efforts of LBACA have helped to reduce asthma hospitalizations and children have gained reasonable control over their asthma symptoms. This year, Miller Children's & Women's Hospital became the first free-standing children's hospital in California to receive Disease Specific Certification in Pediatric Asthma from The Joint Commission, an accreditor of health care organizations. Asthma care was standardized throughout the hospital, including the Emergency Department, pediatric units, the pediatric pulmonary unit and outpatient specialty clinics. The program also monitors how families are managing the child's asthma care at home.

Long Beach is a targeted community in the Welcome Baby program and Miller Children's & Women's Hospital is a program strategic partner. Welcome Baby is a program that provides pregnant women and new moms with information, support and a trusted partner to help them through the journey of pregnancy and early parenthood. Available at no cost to all maternity patients, the Welcome Baby continuum of care includes breastfeeding support, referrals to

community resources and an in home visit from a registered nurse. Welcome Baby is a program of Best Start, an effort funded by First 5 LA.

Community Health Education

Health education classes and events were made available to the public at no cost. Community health education targeted the community at large, populations with health disparities, and information for families with children with special needs. Over 44,000 individuals were reached through community health education. Examples of activities included:

- Parenting classes and health education.
- Health fairs with a special focus on children and their families.
- Assistance with breastfeeding/lactation support available free to all breastfeeding mothers in the community.
- Nutrition and healthy cooking classes.
- Prenatal care, baby care and childbirth preparation classes.
- Injury prevention and safety efforts that included: car seat, seat belt, bike helmet, pedestrian and kitchen safety.
- Support groups for family members/caregivers of children. A number of support groups are offered in Spanish. Support groups include: sickle cell, adolescents, sibling support, HIV, hematology, diabetes, autism, parenting, grief and loss, and breast feeding, among others.
- Special events for children who suffer from chronic disease and disability and their families.
- *CareConnection* newsletter was mailed to service area residents to notify the community of free classes, support groups, and screenings offered at the hospital. The information was also posted on our website.
- Public health education in the media and health awareness events to encourage healthy behaviors and improve preventive practices.
- Community support events focused on the health of children and families that included: Tour of Long Beach, Torch Run, Ronald McDonald Walk for Kids, the Special Olympics, and Super Kids Saturday, among others.

Community-Based Clinical Services

- Health care screening tests held in the community.

Health Care Support Services

- Transportation programs for those families with limited resources to support access to care.
- Information and assistance to enroll in no cost or low cost health insurance programs.

Health Professions Education

Education programs for physicians, medical students, nurses, nursing students, and other health professionals.

Miller Children's & Women's Hospital offers a pediatric residency training program in partnership with the University of California, Irvine. Each year, more than 100 residents and 10 fellows provide specialized care to infants, children and adolescents. Miller Children's offers a General Pediatrics Residency and a Pediatrics/Medical Genetics Residency. Miller Children's also offers fellowship programs that give fellows a selection of pediatric sub-specialty programs including, Neonatology, Perinatology and the Pediatric Pulmonary Fellowship.

In addition to graduate medical education, the hospital has an outstanding nursing education program partnering with local community colleges and California State University Long Beach, School of Nursing. There were undergraduate and graduate student nurses (non-contracted) who participated in a clinical rotation this past year. MemorialCare hospitals administer an H-1B Visa Skills Training Grant Program to provide skills, certifications and training needs in the health care sector.

Other health professionals are educated and perform their clinical hours and/or internship rotations at the hospital. Students are directly supervised by staff. Fields such as child development, pediatric rehab, health care administration, and pharmacy are represented. There were more than 200 students and interns categorized as "other health professionals" educated this year. Through the Welcome Baby Program, 225 persons participated in Lactation Educator Counselor training.

We also provided training and continuing education to community physicians, nurses and other health professionals through a number of different avenues including conferences hosted at our facility. These included: seizures, Glasgow Coma Scale, bleeding and clotting disorders, pediatric cardiac defects, human trafficking, child abuse, mental health, sickle cell anemia, and asthma, among others.

Subsidized Health Services

Subsidized services are clinical programs that are provided to meet an identified community need and are provided despite a financial loss to the organization. The services meet a community need and if not offered would be unavailable in the area or become the responsibility of the government or another non-profit organization. In compliance with regulations, subsidized health service expenses are reported after removing expenses for charity care, Medi-Cal shortfalls and other financial categories.

The Outpatient Specialty Center at Miller Children's & Women's Hospital Long Beach is a major referral center for outpatient pediatric specialty care, offering more than 30 sub-specialties. Some of the clinics include: hematology, oncology, food allergy, developmental, cardiology,

endocrine, neurology, renal, pulmonary, orthopedics, and rheumatology. Children are seen at the Outpatient Specialty Centers for a one-time consultation to treatments for acute, chronic or surgical conditions. The Outpatient Specialty Centers are a California Children's Services (CCS) approved Special Care Center (SCC). Patients typically qualify for the CCS Special Care Center by medical diagnosis, complexity of their disease and financial status. Outpatient Specialty Centers serve as the "medical home" for many patients who need ongoing follow-up care and support. Each specialty center, or clinic within the center, has a multi-specialty care team, with sub-specialists, fellows, residents, advanced practice nurses, registered nurses, child life specialists, social workers, nutritionists and others.

Research

Research is the study or investigation to generate generalizable knowledge made available to the public. Research includes the communication of findings and observations, including publication in a journal. Internally funded research and research funded by tax-exempt or government entities are eligible for reporting.

Miller Children's & Women's Hospital Long Beach is committed to basic science, translational and clinical research. The hospital participates in various national research studies in collaboration with other national children's hospitals to ensure the pediatric health care community stays at the forefront of leading treatments, patient care best practices and new technology. Visit www.millerchildrenshospitallb.org/research/national-studies for details on these national studies. Miller Children's partners with the National Children's Study (NCS), NACHRI (National Association of Children's Hospitals and Related Institutes) and the Children's Oncology Group (COG), nationally, and with USC, UCLA and UCI locally.

Miller Children's clinical research programs support clinical trials in many sub-specialties allowing physicians—armed with the latest in scientific thinking—to provide state-of-the-art treatment options to children who have illnesses where there is no standard therapy or where conventional therapy is failing. Much of the research performed is made possible by grants and other philanthropic support. In compliance with Federal regulations, research expenses are reported after applying the restricted research specific offsetting funding revenue.

Cash and In-Kind Contributions

Funds and in-kind services donated to community groups and non-profit organizations.

MCWHLB provides in-kind donations of meeting space for a number of nonprofit organizations and community groups. Contributions are made to nonprofit organizations, charity events and event sponsorships.

Community Building Activities

Activities that support community assets by offering the expertise and resources of the hospital

organization. These activities may address the root causes of health problems or the determinants of health, such as education, homelessness, poverty and environmental concerns.

Community Support

Staff at Miller Children's & Women's Hospital Long Beach are active community members. They participate in a number of initiatives that support the community at large as well as the community of children and their families.

Coalition Building and Advocacy

One of the ways we care for children is by advocating with legislators and government agencies to help improve pediatric health care, on a local, state and national level. Public policies are critical to a children's hospital's ability to care for all children, through clinical care, training, research and public health. Miller Children's & Women's Hospital, along with other children's hospitals, and the Children's Hospital Association, works with policy makers to ensure children's unique health care needs are not overlooked and every child has access to high quality, cost effective care.

Miller Children's & Women's Hospital Long Beach and its partners strive to:

- Advise on policies that seek to improve children's health care quality and safety
- Spread the word on what works to improve children's health outcomes
- Advocate to local state and government officials to pass laws that protect and promote health of children in the community
- Promote health care reform

Hospital representatives participate in local, regional and state level organizations and committees that address health improvement, including work done with the Long Beach Unified School District, Long Beach Early Childhood Education, Suspected Child Abuse and Neglect Partnership, Best Start, Long Beach Early Intervention Council, SAFE Long Beach, home visitation, Long Beach Alliance for Food and Fitness Collaborative, and pediatric safety.

Leadership Training

The hospital supports Leadership Long Beach, civic improvement program that serves the community by educating and motivating leaders on issues important to the future and sustainability of our city.

Workforce Development

The Hospital participated in community programs that encourage careers in nursing and other health professions.

Financial Summary of Community Benefit

Consolidated financials for Miller Children's & Women's Hospital Long Beach, Community Hospital Long Beach, Long Beach Memorial, Orange Coast Memorial Medical Center and Saddleback Memorial Medical Center.

Community Benefit Categories	Net Benefit
CHARITY CARE ¹	\$9,043,000
UNPAID COSTS OF MEDI-CAL ²	\$113,997,000
OTHERS FOR THE ECONOMICALLY DISADVANTAGED ³	\$0
EDUCATION AND RESEARCH ⁴	\$12,009,000
OTHER FOR THE BROADER COMMUNITY ⁵	\$5,140,000
TOTAL COMMUNITY BENEFIT PROVIDED EXCLUDING UNPAID COSTS OF MEDICARE	\$14,189,000
UNPAID COSTS OF MEDICARE ²	\$62,079,000
TOTAL QUANTIFIABLE COMMUNITY BENEFIT	\$202,268,000

¹ Charity Care includes traditional charity care write-offs to eligible patients at reduced or no cost based on the individual patient's financial situation.

² Unpaid costs of public programs include the difference between costs to provide a service and the rate at which the hospital is reimbursed. Estimated costs are based on the overall hospital cost to charge ratio. This total includes the Hospital Provider Fees (HPF) paid to the State of California.

³ Includes other payors for which the hospital receives little or no reimbursement (County indigent).

⁴ Costs related to the medical education programs and medical research that the hospital sponsors.

⁵ Includes non-billed programs such as community health education, screenings, support groups, clinics and other self-help groups.

Community Benefit Plan FY2017

Miller Children's & Women's Hospital Long Beach will continue to address the identified unmet health needs in our service area through our contributions of community benefit resources. The Community Benefit Oversight Committee provides leadership oversight for community benefit efforts, specifically program planning, implementation, and evaluation.

As a result of the 2016 Community Health Needs Assessment, priority health needs were identified that the hospital chose to address through its Implementation Strategy. For Miller Children's & Women's Hospital Long Beach, selected community benefit efforts focus on increasing and supporting access to health care services through direct programs and partnerships with local community-based organizations. Our programs address the following priority health needs:

- Access to care
- Chronic disease
- Mental and behavioral health
- Overweight and obesity
- Pregnancy and birth outcomes
- Preventive care

Addressing Health Needs

The Implementation Strategy developed from the 2016 Community Health Needs Assessment, spans the period 2017-2019. Miller Children's & Women's Hospital Long Beach will continue to meet the identified priority health needs through a commitment of resources with the following programs and services:

- Financial assistance
- Transportation support
- Family Medicine rotations in community-based clinical services
- Support groups
- School reintegration program for children
- Community health education and health awareness events
- Public health education in the media and community health awareness events to encourage healthy behaviors and prevent chronic diseases
- Physician-led workshops and presentations
- Nutritional counseling
- Exercise programs
- Pediatric safety program
- Welcome Baby program
- Breastfeeding initiatives
- Black Infant Health program

- Free health screenings and flu shot clinics
- Services to address behavioral and mental health
- Cash and in-kind donations to support identified needs

Measuring Impact

Miller Children's & Women's Hospital Long Beach will monitor and evaluate the programs and activities outlined above. The hospital anticipates that the actions taken to address significant health needs will improve health knowledge, behaviors, and status; increase access to care; and help support good health. The hospital is committed to monitoring key initiatives to assess impact and has implemented a system that tracks the implementation of the activities and documents the anticipated impact. Our reporting process includes the collection and documentation of tracking measures, such as the number of people reached/served, increases in knowledge or changes in behavior as a result of planned strategies, and collaborative efforts to address health needs. An evaluation of the impact of the hospital's actions to address these significant health needs will be reported in the next scheduled Community Health Needs Assessment.

Fostering Community Partnerships

We are committed to fostering partnerships with community based organizations, community clinics, government agencies, schools and school districts, the faith community, public health, and public safety agencies. Our community benefit plan includes maintaining current partnerships and exploring opportunities to engage with new partners. Appendix 1 is a partial list of our partners.

We continue to participate in Los Angeles Department of Public Health Office of Planning, Evaluation, and Development needs assessment and community health improvement plan efforts. We will also continue our collaboration with the Long Beach Department of Health and Human Services by participating in the city's Community Health Improvement Plan Task Force. The Long Beach City strategic health plan shares many of our health priorities. We work together to address the area health needs in a collaborative manner.

Appendix 1 – Community Partners

In keeping with the community benefit principle to actively build community capacity and our overall mission and commitment to improve the health and wellbeing of individuals, families and our communities, Miller Children’s and Women’s Hospital, Community Hospital Long Beach, and Long Beach Memorial cultivate and maintain strong ties with community stakeholders. We collaborate with the following organizations (partial listing):

- Alpert Jewish Community Center
- American Heart Association
- American Lung Association
- Best Start Central Long Beach
- Black Infant Health Program
- Building Healthy Communities: Long Beach
- Building Healthy Communities: Long Beach Youth and Parent Workgroups
- California State University Long Beach
- Cambodian Advocacy Center
- Caring Connections Community Partnership Bellflower
- City of Long Beach
- City of Long Beach/Neighborhood Resource Center
- Department of Health Care Services, California Children’s Services (CSS) Advisory Group
- Families in Good Health
- Injury Prevention Alliance of Los Angeles County
- Junior League of Long Beach
- Latinos in Action
- LB Fresh
- Long Beach Alliance for Children with Asthma
- Long Beach Alliance for Food and Fitness
- Long Beach Breastfeeds
- Long Beach Department of Health and Human Services
- Long Beach Early Intervention Council
- Long Beach Ronald McDonald Charity
- Long Beach Unified School District
- Los Angeles County Department of Public Health
- MHALA
- Ronald McDonald Charities of Southern California (RMCSC)
- Safety Belt Safe
- The Children’s Clinic
- United Cambodian Community

- University School of California Irvine School of Medicine
- Walk Bike Long Beach
- Walk Long Beach
- YMCA
